# AHMET SEZEN

**Talented Linux and Unix System Engineer**
Edegem 2650
asezen@gmail.com
+32470187744

ICT enthusiast with a focus on advanced Linux and Unix server management, Cloud Native Solutions, and DevOps.

My primary aim is to empower your team and your business to deliver more value. Having knowledge of various IT topics helps me to understand and solve challenging problems.

Today, IT is involved in a complicated scheme with many abstraction layers. Therefore, I prefer to develop simple solutions rather than complex ones. My solutions are simple, easy to understand, adapt to, and maintain. To me, simplicity equals agility, fewer bugs, and increased reliability.

I enjoy learning new things and sharing them with others because I believe learning and sharing are essential components of success in IT as well as in life.

## Personal Details

**Driver's License:** B
**Highest Level of Education:** Bachelor
**Total years of experience:** 22

## Work Experience

### Linux System Development Engineer

iDirect-Saint-Nicolas
September 2022 to August 2023

Linux System Development Engineer

Core Competencies:

• Collaboration in Agile and Scrum environments to deliver high-quality software solutions.
• Cross-functional team engagement and project management.
• Source code debugging, performance optimization, and bottleneck mitigation.
• System management using Ansible and Puppet, with specialized adjustments to Python and Puppet scripts.
• Script development and automation with an emphasis on Bash.

Linux & Server Administration:

• Administered CentOS servers for optimal performance and security.
• Integrated Jenkins for efficient CI/CD pipeline management.
• Managed and maintained HA Clusters using Pacemaker and Corosync, ensuring seamless uptime and resolving associated issues.
• Configured and managed Apache web servers, optimizing for performance, security, and scalability. Implemented virtual hosts, modules, and directives to cater to specific application needs.
• Implemented and managed Public Key Infrastructure (PKI) to enhance system and network security, ensuring encrypted and verified data transmission.

Containerization & Version Control:

• Adopted Docker for streamlined application deployment and environment consistency.

• Managed version control processes using Git for seamless code collaboration.

Monitoring & Database Management:

• Managed real-time system monitoring initiatives leveraging Grafana and InfluxDB, ensuring proactive issue detection and swift resolution.

• Operated MySQL databases while focusing on performance tuning, query optimization, and ensuring high availability.

Cloud & Infrastructure Tools:

• Worked adeptly within the OpenStack platform, optimizing cloud tasks and functionalities.

• Utilized Terraform for infrastructure as code (IaC) to automate and manage cloud infrastructure, ensuring consistent and reliable environment provisioning.

• Worked closely with the DevOps team to troubleshoot and optimize Terraform scripts, ensuring seamless integration into CI/CD pipelines and enhancing deployment reliability.

• Leveraged Packer for automating the creation of machine images across multiple platforms, streamlining the deployment process and ensuring consistent environment setups.

• Engaged in the deployment and management of VNFM solutions, playing a pivotal role in orchestrating and automating virtualized network functions. This experience contributed to enhancing the efficiency, scalability, and reliability of network operations.

Collaboration Tools:

• Streamlined software issue tracking and resolution processes with Jira.

• Promoted a collaborative work environment and knowledge sharing through Confluence.

Training & Certifications:

• RedHat Kubernetes Training: Acquired in-depth knowledge on container orchestration, cluster management, and application deployment.

• RedHat OpenShift Training: Mastered platform management, containerized application integration, and deployment with Kubernetes.

### IT Consultant

StartUp-Antwerpen

December 2021 to September 2022

• Consulted a software project for Live Video Streaming and Transcoding.

### Linux System Engineer

IBS Group BVBA-Brussels

August 2017 to November 2021

• Design, Provision, Configure, Optimize and Maintain multiple Linux infrastructures, like Debian, CentOS, Ubuntu, Red Hat Enterprise Linux (RHEL), SUSE Linux Enterprise (SLES), and FreeBSD.

• Amazon Web Services (AWS) And Microsoft Azure integrations for infrastructures and applications.

Built and/or maintained;

• Several oVirt, Proxmox, OpenNebula, VMware VCenter, Xen Project virtualization platforms.

• Server clusters (200+ servers) with Ansible simultaneously.

• AWX server on Kubernetes for customer IT team to manage Ansible playbooks.

• Dockerizing/Virtualizing of bare-metal servers.

• Monitoring platforms with Zabbix, Icinga2, LibreNMS, Cacti, Check_MK, Prometheus + Grafana.

• Redhat Satellite 6, including components Foreman, Katello, Puppet and Pulp.

• CEPH clusters for Proxmox virtualization platform.

• Several MySQL and Percona SQL server solutions with High Availability (HA) setups.

• Ubuntu MAAS for bare-metal server management.
• Ubuntu Landscape for Server and Patch Management.
• Several Proxy & Load Balancers with HAProxy, Nginx, Varnish.
• Web Application firewall with Tengine for DDOS protection.
• Kopana Groupware with LDAP integration (Multi-tenant).
• Several bare-metal to cloud/container/VM migrations.
• Load balancing and reverse proxy solutions based on Nginx/HAProxy/Varnish.
• Web server clusters in different topologies with Apache/Nginx/Tengine.
• Complete web stacks like LAMP/LEMP.
• Hosting panels like Plesk/Cpanel/Virtualmin.
• Security and Vulnerability check-ups (Metasploit, Nmap, etc...)
• 50+ servers cluster for high performance and low latency Live Video Streaming & Transcoding.
• Several Tvheadend (TVH) farms with IP convergence.

Some of my daily tasks are;

• Performing Linux kernel tuning/optimization.
• Monitoring System/hardware performance.
• Monitoring Server logs.
• Performing Linux security checks
• Installing with yum/dnf, configuring repositories and Red Hat satellite server on Linux servers, managing Multipathing software like Red Hat Linux Native multipathing, etc.
• Configuring SUDO and granting root permission to users for performing various activities. Zones, Containers, userland configurations, etc.
• Installation of SSH and configuration of key-based authentication, File system tuning, growing and shrinking with open source tools.
• Install and maintain backup solutions.
• Manage Data Center activities, including monitoring of third parties technicians and making sure that tickets are done in conjunction with my team on time.
• Amazon Web Services (AWS), EC2 Storage Management integration and utilization for infrastructures and applications.
• User administration setup, maintaining account, Monitor system performance.
• Creation, Installation, and administration of Red Hat Virtual machines in VMware Environment.
• Activities include user administration; startup and shutdown scripts; crontab, file system maintenance, backup scripting, and automation using Ansible and Shell scripting (bash) for various Linux systems.
• Configuring hands-free installation using Kickstart and PXE.
• Setup and configured network TCP/IP on Linux including RPC connectivity for NFS. Created mount points for Server directories, and mounted these directories on Linux Servers
• Supporting Red Hat Cluster and MySQL databases in High Availability.
• Virtualization with VMware ESX on different HW like HP Proliant, and Dell Power Edge hardware using vCenter server.
• Build the servers from scratch, including installing RAID, and ESXi, assigning IPs, and assigning Networks to Physical machines.
• Storage management, LVM, CEPH, File system management, User account management, data backups, and user’s login support.
• System Software installation and configuration of NFS shares, DHCP and LDAP.

### IT Consultant

ERK Bilisim Yazilim-Istanbul

August 2009 to July 2017

• VMware;

Experienced in VMware vSphere ESXi 5.x/4.x, ESX 4.x/3.5 and vCenter 4/vCenter 5, VDI, vMotion, Storage vMotion, HA, DRS, Host Profiles, SRM 2.0/4.0/5.0, vApp, vCenter Converter, vCenter web plugin, VMware systems monitoring tools and APIs.

Managed and provided connectivity to host and storage through IBM DS3500 storage systems (SAN). Daily monitoring of SAN. Worked with LUNs and Raids. Configuring RAID, Disk Mirroring, SAN Volume Expansion, SCSI Controller Installation.

Expertise in design and implementation of virtualization solutions based on VMware Infrastructures.

High understanding of resource management frameworks like the creation of resource pools, adding VMs into resource pools, and P2V and V2V conversions by using VMware Converter. Completed many P2V migrations using a VMware converter.

Experienced in working with the vMotion technology, working with Storage vMotion technology. Strong knowledge of VMware HA, EVC, and VMware DRS.

Strong understanding of VMware Networking concepts like the creation of vSwitches, different types of port groups, NIC Teaming and VLAN. Increasing resources like HDD, Memory, and CPU.

Worked on HP Proliant, Dell Power Edge, IBM System X, and Super Micro Servers. Both with Rackmounts and Towers.

• Cisco;

Cisco Certification CCNA with experience in a diversified work environment.

Widespread knowledge of Routing, Switching, LAN/WAN, NAT, Intrusion Detection Systems and Prevention Systems (IDS and IPS), Firewall Management, IPSec and VPN Configuration, and VoIP Management.

Hands-on experience with Routing Protocols like EIGRP, OSPFv2, and RIP (both v1/2).

Experienced with switch functionalities and multilayer switching networks like STP, RSTP, CEF, and Ether Channel (PAgP and LACP).

Redundancy Protocols like HSRP, VRRP, and Load Balancing using PAgP and LACP, and PPP over Multilink.

Experience with Layer 2 and Layer 3 security features such as Authentication, Cryptography, IDS/IPS, IPSec, VPN, Firewalls, Standard and Extended Access Lists, Port Security, AAA, IBNS (802.1x)using RADIUS Server, DHCP Snooping.

Worked with VLAN and VTP, Voice VLANs, VLAN Security issues, and implemented Private VLANs.

Configured VoIP using Cisco Call Manager, RTP for real-time voice transfer, settings of QoS, and call controlling signalings like H323 and SIP.

Ability to provide all levels of network troubleshooting and maintenance.

• Microsoft;

Extensive experience with Windows Servers 2003/2008/2012 administration.

Experience with Windows Server Provisioning, Upgrading, and Hardening.

Experience with Microsoft Hyper-V Virtualization Platform.

Extensive Experience with Exchange Server 2003/2007/2010.

Extensive Experience Windows 2003/2008 Active Directory administration.

Experience with AD Group Policies settings.

Knowledge of AD technologies LDAP, Schema, Trust Relationship, DNS, DHCP, Sites Services, Replication, etc.

Experience in creating new containers, new accounts, and security groups, modifying existing accounts, and implementing Group Policy in Active Directory.

Experience in Virtualization working with Hyper-V.

Coordinating with various other support groups both on-shore/site and off-shore for Server builds, backup, Patch Management, Incident Management, Troubleshooting, etc.

• Linux (Redhat/Debian);

Extensive experience in Linux System Administration in Red Hat and Debian Linux.

Extensive experience in Installation, configuration, and administration of RHEL5.x/6.x, Debian Linux 5.x/6.x, and day-to-day administration tasks.

Implemented day-to-day tasks in Red Hat Linux including upgrading RPMs, Kernel tuning, HBA Driver, configuring SANs, Multipathing, and Logical Volume Manager(LVM)

Installation of patches, security fixes, and packages on Linux servers

Providing Troubleshooting and Customer support in critical 24x7 production and development environments.

Expert in automated installation, software distribution, and production deployments.

Experienced in installing LAMP (Linux, Apache, MySQL, and PHP) AND LEMP (NGINX) for different applications.

Expert in Installing, configuring, and maintaining DNS, NIS, NIS+, NFS, DHCP, TCP/IP.

Expertise in implementation and designing disaster backup and recovery plans.

Expertise in Networking (TCP/IP, Ethernet), FTP, NFS, NIS, DNS, DHCP, and RAID levels.

Expert in writing Shell scripts using Bash to ease administration tasks.

Solid skills in analyzing, designing, implementing, and system integration, as well as knowledge of switches, routers, and firewalls.

Experienced with Automatic Configuration of system builds using Puppet and Foreman.

Efficiency in installing, configuring, and implementing the RAID Technologies using various tools.

Expert in Installing, configuring, and maintaining Apache, Nginx, Qmail, Postfix, and OpenVPN.

### IT Manager

Hacisalihoglu Insaat A.S.-Istanbul

March 2007 to July 2009

Build and maintain the company's IT structure.

### IT Specialist

Marjinal A.S.-Ankara

February 2003 to December 2004

Build and maintain company's IT structure.

### IT Sales Engineer

Inter Bilgisayar-Istanbul

March 2002 to January 2003

Building OEM hardware systems with software. Mostly Linux-based.

### IT Sales Engineer

Gelecek A.S.-Istanbul

September 2000 to February 2002

Enterprise support for linux systems. First in my country.

## Education

**Bachelor's Degree in Business Administration**
Sakarya University-Sakarya

## Skills

- MySQL
- Video Streaming Technologies (7 years)
- Cloud Computing (10+ years)
- Routing & Switching (10+ years)
- VoIP (10+ years)
- Git
- Jenkins
- Storage Management (10+ years)
- VMWare
- AWS
- Linux (10+ years)
- DNS
- Network & Security (10+ years)
- Active Directory
- Virtualisation (10+ years)

## Languages

- Dutch - Beginner
- English - Fluent
- Turkish - Fluent

## Certifications and Licenses

**Small and Midsize Business Account Manager Representative - Cisco**
2014 to 2019

Credential ID CSCO11386124

**Small and Midsize Business Engineer Representative - Cisco**
2014 to 2019

Credential ID CSCO11386124

**SMB Engineers - Cisco**
2012 to 2015

Credential ID CSCO11386124

### SMB Account Manager - Cisco
2012 to 2015

Credential ID CSCO11386124

### CCNA Switching and Routing
January 2008 to January 2011

Credential ID CSCO11386124
Cisco Certified Network Associate Routing and Switching (CCNA)

## Groups

### Linux Users Association (TR)
May 2000 to Present

## Publications

### PC Magazine (TR)
March 1999

Hardware Editor, PC Magazine TR.
